UPDATE

WHO How
WHEN ? WHAT
WHERE WHY

Q2 figures prove that InVision is well on track; Remains a BUY

What's it all about?

InVision published its financial statements for the first half of the current fiscal year this morning. The company continued to implement its strategy and its transition towards a SaaS business model with published figures confirming a solid development. In our view, InVision remains on track with a successful and ongoing roll-out of the workforce management software injixo. Scaling its business activities with the existing headcount becomes visible in the released figures and reaching breakeven point remains management's focus. In our view, the recent share price development is unjustified, which is why we confirm our BUY rating and the DCF-based price target of EUR 15.50.

BUY (BUY)

Target price	EUR 15.50 (15.50)

Q2 figures prove that InVision is well on track; Remains a BUY

Solid development in Q2. InVision published its consolidated financial statements for the first half of the current fiscal year this morning. In the first six months, InVision continued to implement its strategy and its transition towards a SaaS business model. The published figures confirm a solid development. In the second quarter of 2023, the company generated total revenues of EUR 4.0m, an increase of 14.3% compared to the same period last year (Q2 2022: EUR 3.51m). Due to a stable cost base, EBIT also developed positively by showing an increase to EUR -0.38m from EUR -0.96m in Q2 2022. The EBIT margin was minus 9.4% compared to minus 27.2% in the same period last year, demonstrating management's cost discipline. In line with the sales and EBIT improvement, the net result also improved from minus EUR 1.18m to minus EUR 0.49m.

Balance sheet remains strong and cash provides security. Cash and cash equivalents increased by 26% to EUR 8.2m at the end of Q2 compared to 31 December 2022 (EUR 6.5m). This seems to be mainly driven by higher customer contract liabilities and other liabilities, which rose to EUR 3.6m compared to EUR 1.2m at the end of FY 22. Although total equity decreased by 16% to EUR 6.7m compared to end of 2022 (EUR 7.9m), the equity ratio remains very solid at 33% (31 December 2022: 42%). Targeting single-digit percentage revenue growth in 2023 and still expecting negative EBIT in the low single-digit million range, we believe the company is well positioned to be financed until cash flow break-even is achieved. The strong balance sheet and sufficient cash provide the company with flexibility and a comfortable financial cushion.

Conclusion. In our view, InVision remains on track with a successful and ongoing roll-out of the workforce management software injixo. While in the past, InVision aimed for fast growth by hiring new employees, this has been shifted to slower growth but earlier break even. Against the backdrop of inflation and recession, we believe this seems to be the more promising and efficient approach. Scaling its business activities with the existing headcount becomes visible in the released figures and reaching breakeven point remains management's focus. In our view, the recent share price development is unjustified, which is why we confirm our BUY rating and the DCF-based price target of EUR 15.50.

Company background

InVision in a nutshell

InVision AG is a Germany-based information technology (IT) company and software developer. The company develops and markets products and services for workforce management (WFM) to ensure business output and working conditions. InVision is mainly active in Europe and the United States. Its core products and services are injixo (WFM software) and The Call Center School (Digital Education). injixo is a cloud-based workforce management suite for forecasting, scheduling, intraday management, and reporting, mainly in contact centers. In addition, The Call Center School offers an e-learning platform and training programs for contact centers. InVision was founded in 1995 and operates offices in Leipzig, Paris, London, Utrecht, Chicago, and Zurich. The headquarters are in Düsseldorf, Germany.

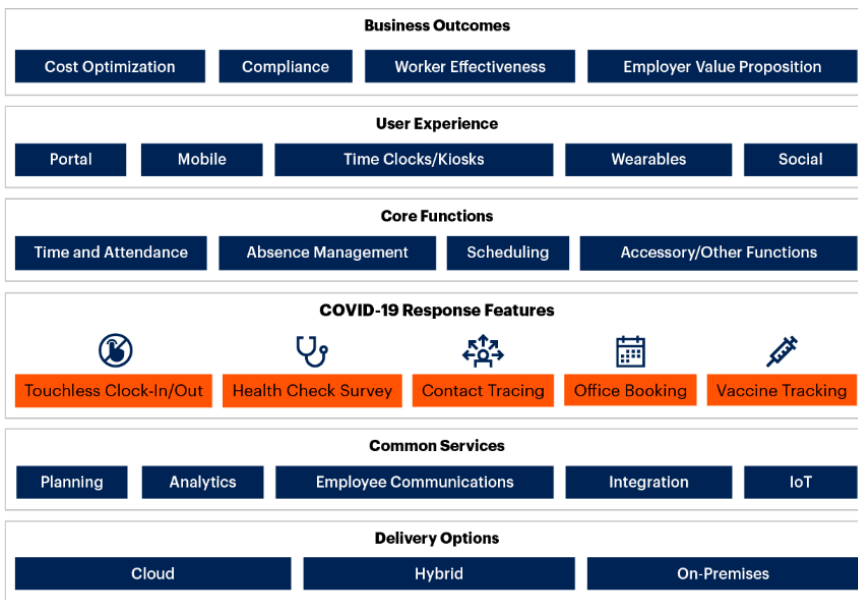

Products & services

InVision's core product 'injixo' is a workforce management solution. This WFM software can be explained in one sentence: **Ensure to have the right number of employees with the right skills in the right place at the right time!**

injixo – a workforce management software

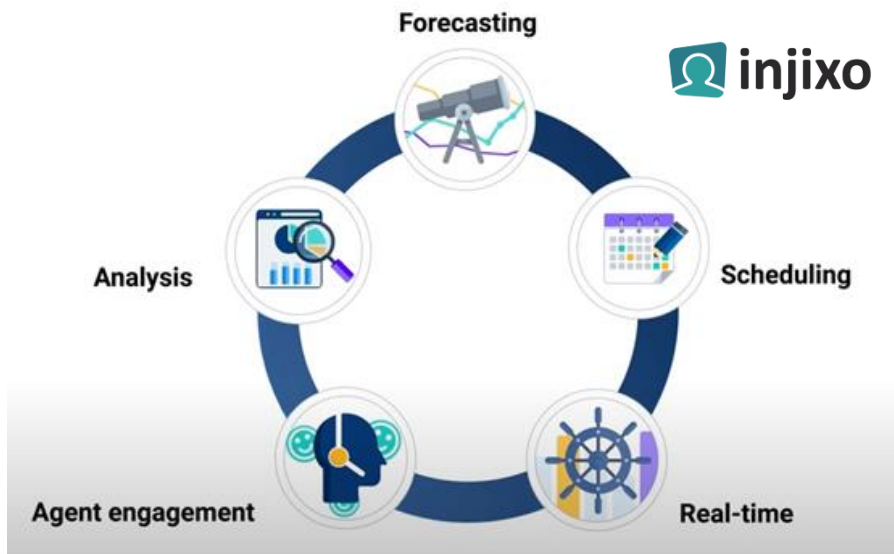

A quick and effective scheduling process is key to making the right business decisions, optimizing staff, and increasing efficiencies across teams. injixo is a workforce management software to schedule work hours for employees, and to give workers and managers a real-time visibility onto the schedule. This makes scheduling and organizing more efficient, fairer, and less personal for both parties. Managers can post and plan shifts far in advance and schedule employees based on their preferences.

WFM helps organizations to manage the operational deployment of their workers – overview of key features

Source: Gartner, AlsterResearch

injixo's core competence

Source: Company data, AlsterResearch

Some key functions of workforce management are....

- Workload Forecasting
- Schedule Optimization
- Intraday Management
- Employee Analytics
- Employee Empowerment

....which are leading to...

- Improved productivity
- Reduced time consumption
- Increased efficiency
- Stable and consistent workflows
- Reduced risks as costly errors are eliminated
- Increased employee engagement

...in customer's organizations.

WFM – experience for almost 30 years

The first InVision WFM solution was launched in 1995 as an on-premises solution, but InVision started early in migrating to a cloud-based version. Since 2011, the WFM software is available as software-as-a-service and can be utilized in 6 languages: German, English, French, Italian, Spanish and Dutch. This enables an almost global usage.

SaaS – migration into the cloud

In 2018, the company modified its sales structures. For several years now, InVision has been offering its core product injixo as a SaaS with monthly fees. The three pricing plans start with an entry-level product for 19 euros per user and month. The enterprise version can be adapted and integrated by individual factors to meet customer-specific needs. The majority of customers opt for the Advanced WFM version.

Management

Mr. Bollenbeck is CEO and since 2018 sole board member of InVision. As one of the founding members, he has been the CEO of InVision since its beginnings in 1995. InVision's achievements can be attributed to Mr. Bollenbeck's entrepreneurial and leadership skills.

Source: Company data, AlsterResearch

Shareholders

Main shareholders in InVision are its founders Peter Bollenbeck, Matthias Schroer and Armand Zohari through their private ownership. InVision Holding GmbH which is owned and controlled by Mr. Bollenbeck holds 18% of shares outstanding, hence Mr. Bollenbeck holds in sum 35% of shares outstanding. In total, some 56% of shares (InVision Holding, Bollenbeck, Schroer, Zohari) are pooled by an agreement. Taking a further larger investor (c. 15% of shares outstanding) into account, a free float of 29% is held by the remaining investors.

Shareholder structure

SWOT analysis

Strengths

- Internationally experienced since 1995 and First Mover
- Offering AI-driven Software-as-a-Service (SaaS) since 2011
- Increasing share of recurring revenues (ARR)
- Platform business model at tipping point and ready to scale
- Proven track-record with well-known Blue-Chip clients

Weaknesses

- While customers come from all industries, the solution is still depending on workforce management in contact centers
- High cash-burn until break-even
- Single product company
- Modest sales performance in the recent years due to realignment process

Opportunities

- High sales growth opportunities at existing and new customers
- Launching injixo in new industries
- SaaS model is particularly interesting for smaller users, due to lower ramp-up costs and reduced barriers (greenfield market)
- Expanding the partner network provides access to a larger customer base; Plug-In solution enables distribution by partner network (e.g., Freshdesk)

Threats

- Available liquid funds for strategic progress may not be sufficient
- Intense competition
- Larger players offer the broader portfolio (one-stop-shops)
- New players could enter the market despite significant costs of development
- Decreasing number of call centers globally

Valuation

DCF Model

The DCF model results in a **fair value of EUR 15.08 per share**:

Top-line growth: We expect InVision AG to continue benefitting from structural growth. Hence our growth estimates for 2023E-2030E is in the range of 9.6% p.a. The long-term growth rate is set at 2.0%.

EBIT margins. Once the break-even was reached, the company is assumed to improve its margin steadily and reaching levels of more than 20%. This however are conservative assumptions, as 25% margins seem to be feasible.

WACC. The averaged 1-, 3- and 5-year historical equity beta is calculated as 1.40. Unlevering and correcting for mean reversion yields an asset beta of 0.99. Combined with a risk-free rate of 2.0% and an equity risk premium of 6.0% this yields cost of equity of 14.2%. With pre-tax cost of borrowing at 5.0%, a tax rate of 30.0% and target debt/equity of 1.5 this results in a long-term WACC of 7.8%.

FCF Yield Model

Due to the fact that companies rarely bear sufficient resemblance to peers in terms of geographical exposure, size or competitive strength and in order to adjust for the pitfalls of weak long-term visibility, an Adjusted Free Cash Flow analysis (Adjusted FCF) has been conducted.

The adjusted Free Cash Flow Yield results in a fair value between EUR -11.03 per share based on 2023E and EUR 24.20 per share on 2027E estimates. **We value InVision AG halfway 2024E/2025E, which yields an average price target of EUR 34.00.** It thus supports the DCF based fair value calculations.

The main driver of this model is the level of return available to a controlling investor, influenced by the cost of that investors' capital (opportunity costs) and the purchase price – in this case the enterprise value of the company. Here, the adjusted FCF yield is used as a proxy for the required return and is defined as EBITDA less minority interest, taxes and investments required to maintain existing assets (maintenance capex).

FCF yield in EURm	2023E	2024E	2025E	2026E	2027E

Source: Company data; AlsterResearch

Simply put, the model assumes that investors require companies to generate a minimum return on the investor's purchase price. The required after-tax return equals the model's hurdle rate of 7.0%. Anything less suggests the stock is expensive; anything more suggests the stock is cheap. **ESG adjustments might be applicable, based on the overall Leeway ESG Score. A high score indicates high awareness for environmental, social or governance issues and thus might lower the overall risk an investment in the company might carry. A low score on the contrary might increase the risk of an investment and might therefore trigger a higher required hurdle rate.**

Conflicts of interest

Disclosures regarding research publications of SRH AlsterResearch AG pursuant to section 85 of the German Securities Trading Act (WpHG) and distributed in the UK under an EEA branch passport, subject to the FCA requirements on research recommendation disclosures. It is essential that any research recommendation is fairly presented and discloses interests of indicates relevant conflicts of interest. Pursuant to section 85 of the German Securities Trading Act (WpHG) a research report has to point out possible conflicts of interest in connection with the analyzed company. Further to this, under the FCA's rules on research recommendations, any conflicts of interest in connection with the recommendation must be disclosed. A conflict of interest is presumed to exist in particular if SRH AlsterResearch AG

- (1) or its affiliate(s) (either in its own right or as part of a consortium) within the past twelve months, acquired the financial instruments of the analyzed company,
- (2) has entered into an agreement on the production of the research report with the analyzed company,
- (3) or its affiliate(s) has, within the past twelve months, been party to an agreement on the provision of investment banking services with the analyzed company or have received services or a promise of services under the term of such an agreement,
- (4) or its affiliate(s) holds a) 5% or more of the share capital of the analyzed company, or b) the analyzed company holds 5% or more of the share capital of SRH AlsterResearch AG or its affiliate(s),
- (5) or its affiliate(s) holds a net long (a) or a net short (b) position of 0.5% of the outstanding share capital of the analyzed company or derivatives thereof,
- (6) or its affiliate(s) is a market maker or liquidity provider in the financial instruments of the issuer,
- (7) or the analyst has any other significant financial interests relating to the analyzed company such as, for example, exercising mandates in the interest of the analyzed company or a significant conflict of interest with respect to the issuer,
- (8) The research report has been made available to the company prior to its publication. Thereafter, only factual changes have been made to the report.

Conflicts of interest that existed at the time when this research report was published:

Company	Disclosure
InVision AG	2, 8

Important disclosures

1. General Information/Liabilities This research report has been produced for the information purposes of institutional investors only, and is not in any way a personal recommendation, offer or solicitation to buy or sell the financial instruments mentioned herein. The document is confidential and is made available by SRH AlsterResearch AG, exclusively to selected recipients [in DE, GB, FR, CH, US, UK, Scandinavia, and Benelux or, in individual cases, also in other countries]. A distribution to private investors in the sense of the German Securities Trading Act (WpHG) is excluded. It is not allowed to pass the research report on to persons other than the intended recipient without the permission of SRH AlsterResearch AG. Reproduction of this document, in whole or in part, is not permitted without prior permission SRH AlsterResearch AG. All rights reserved. Under no circumstances shall SRH AlsterResearch AG, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report – neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.

2. Responsibilities This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently. The content of the research report was not influenced by the issuer of the analyzed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.

3. Organizational Requirements SRH AlsterResearch AG took internal organizational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of AlsterResearch AG involved in the preparation of the research report are subject to internal compliance regulations. No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis. In case a research analyst or a closely related person is confronted with a conflict of interest, the research analyst is restricted from covering this company.

4. Information Concerning the Methods of Valuation/Update The determination of the fair value per share, i.e., the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow – DCF model. Furthermore, a peer group comparison is made. The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate. The operating cash flow is calculated as EBITDA less maintenance capex and taxes. Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e., interest and repayments on debt capital are not factored in initially. The adjustment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value. Detailed information on the valuation principles and methods used and the underlying assumptions can be found at <https://www.alsterresearch.com>.

SRH AlsterResearch AG uses the following three-step rating system for the analyzed companies:

- **Speculative (Spec.) BUY:** Sustainable upside potential of more than 25% within 12 months, above average risk
- **BUY:** Sustainable upside potential of more than 10% within 12 months
- **SELL:** Sustainable downside potential of more than 10% within 12 months.
- **HOLD:** Upside/downside potential is limited. No immediate catalyst visible.

NB: The ratings of SRH AlsterResearch AG are not based on a performance that is expected to be "relative" to the market.

The decision on the choice of the financial instruments analyzed in this document was solely made by SRH AlsterResearch AG. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of SRH AlsterResearch AG whether and when it publishes an update to this research report, but in general updates are created on a regular basis, after 6 months at the latest. A sensitivity analysis is included and published in company's initial studies.

5. Date and time of first publication of this financial analysis
24-Aug-23 12:13:48

6. Risk information

- Stock exchange investments and investments in companies (shares) are always speculative and involve the risk of total loss.
- This is particularly true in respect of investments in companies which are not established and/or small and have no established business or corporate assets.
- Share prices may fluctuate significantly. This is particularly true for shares with low liquidity (market breadth). Even small orders can have a significant impact on the share price.
- In the case of shares in narrow markets, it may also happen that there is no or very little actual trading there and that published prices are not based on actual trading but have only been provided by a stockbroker.
- In such markets a shareholder cannot expect to find a buyer for his shares at all and/or at reasonable prices. In such narrow markets there is a very high possibility of manipulating prices and in such markets there are often considerable price fluctuations.
- An investment in shares with low liquidity and low market capitalization is therefore highly speculative and represents a very high risk.
- There is no regulated market for unlisted shares and securities and a sale is not possible or only possible on an individual basis.

7. Major Sources of Information Part of the information required for this research report was made available by the issuer of the financial instrument. Furthermore, this report is based on publicly available sources (such as, for example, Bloomberg, Reuters, VWD-Trader and the relevant daily press) believed to be reliable. SRH AlsterResearch AG has checked the information for plausibility but not for accuracy or completeness.

8. Competent Supervisory Authority SRH AlsterResearch AG are under supervision of the BaFin – German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), Graurheindorfer Straße 108, 53117 Bonn and Marie-Curie-Straße 24 – 28, 60439 Frankfurt a.M. This document is distributed in the UK under a MiFID EEA branch passport and in compliance with the applicable FCA requirements.

9. Specific Comments for Recipients Outside of Germany This research report is subject to the law of the Federal Republic of Germany. The distribution of this information to other states in particular to the USA, Canada, Australia and Japan may be restricted or prohibited by the laws applicable within this state.

10. Miscellaneous According to Article 4(1) No. i of the delegated regulation 2016/958 supplementing regulation 596/2014 of the European Parliament, further information regarding investment recommendations of the last 12 months are published free of charge under <https://www.alsterresearch.com>.
